SUMMARY

Junior Python backend developer with 1+ year of experience (two internships and 5 months full-time) building REST APIs and web applications with Django, Django REST Framework, FastAPI and PostgreSQL. Built the ELINKJAL water distribution management system as the only developer on the project, covering role-based access control, Django Channels WebSockets and Chart.js/Leaflet dashboards. Looking for a full-time Junior Python / Django Backend Developer role.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS
Backend Frameworks: Django, Django REST Framework, FastAPI, Django Channels (WebSockets)
APIs & Concepts: RESTful APIs, Role-Based Access Control (RBAC), Authentication, OTP Verification, SMTP Email, WebSockets
Databases & Drivers: PostgreSQL, SQLite, Django ORM, psycopg2
Frontend: JavaScript (AJAX), Bootstrap, Chart.js, Leaflet
Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Elink Software Technologies Pvt. Ltd. – Bandra, Mumbai
Jr. Python Developer (Full-Time) Feb 2026 – Jun 2026
Jr. Python Developer Intern (promoted to full-time) Oct 2025 – Jan 2026
Project: ELINKJAL – Non-Revenue Water (NRW) Water Distribution Management System | Python, Django, DRF, PostgreSQL, Leaflet, Chart.js

- Developed backend modules and RESTful APIs (Django REST Framework) using Python, Django and PostgreSQL, as the only developer on the project (UI, backend and database).
- Built a hierarchical registration flow (Location → Sub-location → Tank) with Django ORM and PostgreSQL, capturing coordinates through map clicks on an interactive Leaflet map.
- Implemented authentication with self-built OTP generation and verification for password reset (SMTP email), and role-based access control (RBAC) so only admin-authorized users could register locations, sub-locations and tanks.
- Built an engineer management module for registering engineers and storing each engineer's device IP address.
- Built Chart.js dashboards for water flow, distribution and history (using sample data) and used Django Channels WebSockets to update chart data without page refresh.

Sky Need Solution Pvt. Ltd.
Jr. Backend Developer Intern Oct 2023 – Mar 2024
Project: HR Management System | Python, FastAPI, psycopg2, PostgreSQL

- Developed an HR management system as the only developer (UI, backend and database) using FastAPI and PostgreSQL (raw SQL via psycopg2), covering employee management with CRUD APIs, attendance (present/absent) tracking and leave management.
- Built a leave request and approval workflow with SMTP email notifications.
- Implemented username-password authentication for the API endpoints.

PROJECTS

Shopee E-Commerce Web Application (College Project) github.com/Dhiru9136/shopeeproject
Python, Django, SQLite, HTML

- Built a solo e-commerce web application with user signup/login, product listing with search and price sorting (min–max), cart and order checkout.
- Managed the product catalog through the Django admin panel.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT) Aug 2021 – May 2025
Nirmala Memorial Foundation College, Mumbai, Maharashtra CGPA: 7.0 / 10
